16. Use appropriate care for all cultures and do not take cultures out of the laboratory.
17. Wear disposable gloves when working with potentially infectious microbes or samples (e.g. sewage). If you are working with a sample that may contain a pathogen, then be extremely careful to use good bacteriological technique.
18. Never pipette hazardous chemicals by mouth. [Mouth pipetting is strictly prohibited].
19. Consider everything a biohazard. Do not pour anything down the sink. Autoclave liquids and broth cultures to sterilize them before discarding.
